Data Analytics MSc graduate with hands-on experience in Excel, SQL, Python, and Power BI. Proven ability to produce automated reports and insights across operations, ensuring data accuracy and compliance. Strong documentation skills and familiarity with GDPR and role-based access. Currently enhancing skills in Alteryx and advanced Excel to support scalable, self-serve analytics in collaborative environments.

Technical Skills:

- **Data Analysis & Reporting:** Excel (Pivot Tables, VLOOKUP, Advanced Formulas), SQL, Power BI (DAX, parameter filters), PowerPoint
- **Programming & Data Tools:** Python (Pandas, NumPy, Matplotlib, Seaborn), Git, GitHub
- **BI & Workflow Tools:** Alteryx (basic), Microsoft Azure, Google Cloud Platform (Vertex AI), ServiceNow
- **Statistical Techniques & Data Modelling:** Descriptive Statistics, Correlation Analysis, Regression, ANOVA, Clustering, Random Forest, XGBoost
- **Data Governance & Compliance:** GDPR Compliance, Role-Based Access Control, Secure Data Handling, Process Documentation

Experience:

Glider Aerial Solution Pvt. Ltd. June 2025 – July 2025

Data Analyst Intern

- Developed an object detection pipeline using YOLOv5 on drone imagery to support precision agriculture applications.
- Annotated and managed large geospatial datasets using Roboflow; maintained version control and documentation with Git.

Victoria Solutions (Remote) April 2025 – May 2025

Data Analytics Intern (Training Program)

- Built customer segmentation workflows using Vertex AI, automating churn prediction for 500+ records.
- Created Power BI dashboards with slicers, calculated fields, and filters to present seasonal demand and stock trends.
- Applied clustering and ANOVA to identify key customer segments and inform product targeting strategies.

TATA Consultancy Services Nov 2021 – Dec 2023

Assistant Systems Engineer (Contracted to H&M)

- Designed real-time alert monitoring dashboards, enhancing incident management by 20%.
- Supported Agile delivery cycles through daily stand-ups, sprint planning, and ticket handovers.
- Analysed operational trends from incident management tools to improve service performance.
- Delivered insights for vulnerability management across servers and applications.
- Authored knowledge articles and updated SOPs, improving documentation and team transitions.

Key Project:

PKI Server Migration to Windows Server 2019 Dec 2022 – Jun 2023

- Led full migration of legacy PKI servers, coordinated across technical teams, and ensured SLA adherence.
- Documented processes, test cases, and implementation steps to support system reliability.

Security Deployment Lead Jun 2023 – Dec 2023

- Enforced GDPR-aligned policies and led workflow assessments to identify compliance gaps.
- Managed onboarding/offboarding via Excel automation (VLOOKUP, Pivot Tables) to ensure access control.
- Conducted compliance checks on 300+ systems and generated remediation reports.
- Oversaw role-based access provisioning, enhancing data integrity and governance.
- Delivered training on secure data handling and documentation best practices.

Case Study:

Evaluating Diabetes Care Outcomes Using the NHS National Diabetes Audit (2021–22)

Tools: Python, Power BI **| Dataset:** NHS NDA (via data.gov.uk) **| GitHub:** Diabetes-data-piepline-uk

- Conducted exploratory data analysis on NHS audit data to evaluate Type 1 & 2 diabetes care using NICE benchmarks (HbA1c, BP, Cholesterol).
- Applied statistical scoring and correlation analysis to assess outcomes at regional and provider levels.
- Developed Power BI dashboards with interactive filters and performance indicators to support intuitive insights and ongoing monitoring.
- Documented the full pipeline and aligned output with healthcare reporting standards, ensuring data accuracy and traceability.

Education:

MSc Data Analytics | Aston University Jan 2024 – Jan 2025

B. Tech Mechanical Engineering | SRM University Jun 2017 – Jun 2021

Certification:

- NVIDIA Fundamentals of Deep Learning – *Expected Aug 2025*
- Alteryx Foundational Micro-Credential – *Expected Aug 2025*
- AWS Educate – Introduction to Generative AI (2025)
- Microsoft Azure Fundamentals (2022)

Hobbies:

- ***Bouldering & Rock Climbing:*** Builds problem-solving and focus while promoting mental and physical well-being.
- ***Swimming:*** Enhances endurance and mental clarity while supporting discipline, focus, and overall physique.
